TESTED FOR GERMINATION

One of the most expert and reliable seed analysts in the country tests each lot of our seed for germination. In addition to this, many kinds are sent to Market Growers for further test in their greenhouses.

PROVEN SEED

Many of our seed stocks of such kinds as Celery, Lettuce, Cauliflower, Cabbage, etc., are tried out by growers the year previous to our offering them for sale, that we may know the results they produce. This is what we call "proven seed." It is a test for purity of strain.

Cauliflower

Early Snowball—The seed of this strain of Snowball Cauliflower is grown for us by a man known to many as one of the most expert and reliable Cauliflower seed growers in Europe. We have reason to believe from the reports brought to us by Cauliflower growers who use this seed year after year that it is far above the average Early Snowball seed offered. It matures early and evenly. The pure white heads are remarkable for their great depth and unexcelled white color and do not become "soft" or "ricy" and you will not find any with green leaves in them.

Onion Seed,

Early Yellow Globe—Very early, large, globe-shaped onions with bright yellow skin and mild, juicy, pure white flesh. A good keeper. Oz., 20c.; $\frac{1}{4}$ lb, 60c.; lb, \$2.00; 5 lbs or more \$1.90 per lb.

Danver's Yellow Globe—The stocks we offer are reselected, plump, heavy seed that will make a strong plant and a solid bulb. From the results growers are getting from this Reselected Danver's Yellow Globe we believe it cannot be beaten for quality. Oz., \$.15; $\frac{1}{4}$ lb, \$.45; lb, \$1.60; 5 lbs or more \$1.50 per lb.

Mountain Danver's—Our special strain of seed of this early Yellow Globe is grown for us in the mountains of Colorado. It matures two weeks earlier than Yellow Globe Danver's, is of true globe shape, deep yellow skin and very firm. It is a remarkable keeper and can be stored all winter. Onion growers who have had this Special Strain of Mountain Danver's like it very much. We offer new crop, plump, heavy seed. Hart & Vick's Famous Asters

Aster Growers Attention!

We recommend all Aster growers, whether they have been bothered with disease or not, to use "wilt-resistant" seed where ever possible. We feel sure that by sowing "wilt-resistant" seed many disappointments due to Aster crop failures will be eliminated. This year we offer "wilt-resistant" seed of twenty kinds. More will be ready next season.

HART & VICK'S WHOLESALE PRICE LIST

Hart & Vick Sweet Peas

Early Flowering Spencer Varieties

Here is a list of the very finest of these new Early Flowering or Winter Forcing Sweet Peas that are now so popular with florists all over the country. Not only are they by far the best to grow under glass, but are being used by florists for outdoor growing where they bloom from 2 to 3 weeks earlier than the regular Spencers. For florists in our Southern States and in all warmer climates they are indispensable. Our seed is all hand picked and as fine as can be grown.

We supply $\frac{1}{2}$ Oz. at the ounce rate, $\frac{1}{4}$ lb at the pound rate.
